

Cube

Created by Aaron Krerowicz

This pattern (and many others) may be downloaded for free at www.AaronKrerowicz.com

GENERAL RULES

The solid black perimeter lines indicate where to cut the paper. The cut-out should always be square.

Fold the paper so 1 touches 1, 2 touches 2, 3 touches 3, et cetera. Occasionally numbers will be supplemented with letters (ex: 7a and 7b). These indicate multiple points that need to touch in a single fold (ex: 7a must touch 7a, and 7b must touch 7b simultaneously).

Outlined numbers (ex: 1) are to be folded, creased, and unfolded. Overlined numbers (ex: 1) indicate that only the top layer of paper (and not all layers) are to be folded.

The gray lines and accompanying numbers in parentheses illustrate where each fold should crease the paper. After making each fold, double check that you did it correctly by unfolding it and ensuring the crease is in the right place.

INSTRUCTIONS

Fold 1 to 1, crease, and unfold.

Fold 2 to 2, crease, and unfold.

Fold 3 to 3, crease, and unfold.

Fold 4 to 4, crease, and unfold.

Fold 5a to 5a, 5b to 5b, 5c to 5c, and 5d to 5d. Press flat.

Fold 6 to 6.

Fold 7 to 7.

Fold 8 to 8.

[There is no 9.]

Fold 10 to 10.

Fold 11 to 11.

Fold 12 to 12.

Fold 13 to 13.

Fold 14 to 14.

Fold 15 to 15.

Fold 16 to 16.

Fold 17 to 17.

Fold 18 to 18.

Fold 19 to 19a, crease, and unfold; then separate the top layer of the 19a flap from the layer underneath. This will reveal 19b. Fold 19 to 19b.

Repeat this last step with 20, 21, and 22.

Inflate the cube by blowing into the hole at the 3/4 end (as opposed to the 6/7/8/10 end).

To make inflation easier, fold both points (3/4, and 6/7/8/10) to the center, crease, and unfold. Do this on both sides. This will help define the shape.
