

GENERAL RULES

The solid black perimeter lines indicate where to cut the paper.

Fold the paper so 1 touches 1, 2 touches 2, 3 touches 3, et cetera. Occasionally numbers will be supplemented with letters (ex: 7a and 7b). These indicate multiple points that need to touch in a single fold (ex: 7a must touch 7a, and 7b must touch 7b simultaneously).

Outlined numbers (ex: 1) are to be folded, creased, and unfolded. Overlined numbers (ex: 1̄) indicate that only the top layer of paper (and not all layers) are to be folded.

The gray lines and accompanying numbers in parentheses illustrate where each fold should crease the paper. After making each fold, double check that you did it correctly by unfolding it and ensuring the crease is in the right place.

Helicopter

INSTRUCTIONS

This sheet contains four helicopters. Repeat these instructional steps for each helicopter individually.

Cut out one of the four helicopters by cutting along the thick perimeter lines.

Once you have a single helicopter, cut where indicated.

Fold 1 to 1 and crease firmly.

Fold 2 to 2 and crease firmly.

Fold the wings (A to A, and B to B).

Optional: add a paper clip to the base to hold the folds together and to add weight.

Launch the helicopter by throwing it straight up in the air.
