

GENERAL RULES
The solid black perimeter lines indicate where to cut the paper. The cut-out should be square. Fold the paper so 1 touches 1,2 touches 2,3 touches 3 , et cetera. Occasionally numbers will be supplemented with letters (ex: 7a and 7b). These indicate multiple points that need to touch in a single fold (ex: 7a must touch 7 a , and 7 b must touch 7 b simultaneously).

Outlined numbers (ex: $\mathbb{1}$ ) are to be folded, creased, and unfolded. Overlined numbers (ex: $\overline{1}$ ) indicate that only the top layer of paper (and not all layers) are to be folded.

The gray lines and accompanying numbers in parentheses illustrate where each fold should crease the paper. After making each fold, double check that you did it correctly by unfolding it and ensuring the crease is in the right place.
